About

Active open-source contributor and Design Engineer deeply focused on crafting the best possible product experience for the end user. Passionate about startups and building impactful digital experiences.

All I want to do is create—websites, motion design, interactive components, performance optimizations. I also actively share knowledge about technology, design, and development.

Experience

Design Engineer
Refine   Jan 2024 - Mar 2025

Helping startups around the world build their products. I would classify my role here as a design engineer who actively works on the front-end seeking the best UX, Design and Accessibility for users.

- Building reusable components/primitives
- Developing delightful user interactions and features
- Providing guidance based on web practices or experience.
- Cross-browser support
- Support for inclusive input modes (touch, pointers, etc.)
- Respecting user preferences
- Accessible to users of assistive technology

Design Engineer - Founder
Comakit   Jun 2023 - Present

Creating a Design System / React UI Library. We are creating something very interesting and preparing for a complete rebranding coming soon.

- Building reusable components/primitives
- Developing delightful user interactions and features
- Providing guidance based on web practices or experience.
- Accessible to users of assistive technology
- Using partner libraries like Radix, AriaKit

Software Engineer
Muden   Jan 2022 - Jul 2023

Building a recently founded startup for freelancers. My role was to lead the front-end development of the entire product.

- Building a real-time chat for user communication
- Integrating Stripe payment methods and using webhooks
- Building scalable hooks and queries with react-query + supabase.
- Using SQL to build more specific database queries

Developer Advocate
ExpressoTS   Jun 2022 - Dec 2022

The Developer-Friendly Node.js framework for creating highly maintainable server-side applications.

- Actively contributing to product design
- Participating in decision meetings
- Helping the community use our framer work
- Contributing to day-to-day issues

Communities

Unkey   unkey.com
Actively contributing to the open source product, active in the community always posting content and interacting with team members.

Cmdk   cmdk.paco.me
I participated in some issues to improve the performance and DX of the library.

Building Public

- Unkey Dashboard Idea
- Unkey API Cards
- Blockchain Feedback
- Finance Dashboard
- Comaqui Sidebar
- Breadz
- Unkey Usage
